Bachelor Meeting Baran Gözcü

Joanna Brodbeck

November 29, 2023

Skills

- Machine Learning

  - How to predict with missing data?
  - How to use least-squares
  - KFold with different lambdas
  - How to work with images in the machine learning part and neural networks context

- Computer Vision

  - since September visiting Visual Computing
  - Next semester: Visualization, Simulation and Interaction I
  - Ready to catch up the other missing pieces

- Programming

  - Reliable Transport Protocol (C)
  - Machine Learning Projects (Python)
  - Wooden Box (Python)
  - Whatsapp Bot (Python) (current)
  - Countdown App (Android Studios) (current)
  - Website (Typescript) (current)

Motivation

- Medical aspect from family: Sister studied Medicine

- Want to make the world a better place

- Love to computer science

- Programming is a hobby of mine, which I am passionate about.

- Love to learn new things

- I wonder how different kind of things work.

Questions

1. What if I am stuck in the process of the bachelor thesis?

2. What language am I programming in?

3. What is the deadline for the bachelor thesis

4. How many meetings are there? (1x per week?)

5. Who am I working with? Alone? Team?

6. Explain further what the thesis are about

7. Expectation of workload?

8. Duration and starting date?

9. Communication other than Email?

10. What kind of guidance can I expect?

11. Things to learn before the thesis?
